Maths Hub News

NCETM Updates

The Maths Hubs Network and the [NCETM](#) are continuing to provide subject-specific professional development and support for all primary and secondary teachers of maths in 2022. All professional development opportunities are designed so they can adapt to changing circumstances and ensure that participants can collaborate safely and effectively.

There are still spaces available on a range of Maths Hubs projects, including [Years 5-8 Continuity](#), which focuses on the transition between primary and secondary maths, and a variety of Specialist Knowledge for Teaching Mathematics programmes, designed to support teachers at all stages of their career.

Many Maths Hubs are also running Work Groups focusing on issues and topics specifically identified as relevant to their local area. At East Midlands East Maths Hub, these include [Developing Shared Approaches to Maths and Science Teaching](#).

In the last term of 2021, the Department for Education published [new guidance for teaching maths at KS3](#). It was written by the Secondary Team at the NCETM, and additional resources to augment the guidance, including a two-minute explainer video and a podcast, are now available.

East Midlands East Updates

Following national guidance we have recommended that Work Groups should be delivered online during January or postponed until February onwards.

A number of Work Group Leads have postponed their sessions and e-mails with new dates have been sent to participants.

There are still places available for the following Work Groups for this year; please follow the links for more information and the booking form:

- [Year 5-8 Continuity](#)
- [Developing Shared Approaches to Maths and Science Teaching](#)
- [Secondary Subject Leadership Network](#)
